Risks, crises, and the humanities and social sciences: toward inclusive occupational and environmental health observatories

October 24-26, 2022

Centre de colloques du Campus Condorcet
Place du Front populaire
93322 Aubervilliers cedex

Registration required (free of charge):
The issues arising from the climatic and environmental upheavals affecting our planet are currently the focus of the ever-growing involvement of a number of scientific fields, as much for diagnosing the situation and predicting future changes as for developing a range of technical and political solutions. Among these issues, the links between health and the environment are of key importance in a context of multiple crises – ecological, economical, social and political. Indeed, the accumulation of numerous pollutants in our living and working environments, the on-going urbanisation of the land, drastic climate change, the deterioration of soil quality and the accumulation of wastes, among other issues, all have a strong impact on human health.

In order to overcome these complex challenges, the calls for research primarily concern the so-called exact or natural sciences. This conference aims to explore the possible roles of the humanities and social sciences, independently or in cooperation with other disciplines, and to propose directions of research that will improve the understanding of the issues, the measurement of the impact on societies of environmental and climatic transformations, and the definition of policies that could be adopted in response. In particular, the goal is to contribute to the formulation of questions on the contemporary approach to these problems and propose answers that more clearly account for the blind spots of the current approaches, thus enabling a better response to the multiple demands of concerned citizens. Actually, the environmental health risks faced by contemporary societies must be examined from fresh points of view in order to take some of their specificities into account, such as their low social visibility, the inequalities that they engender, perpetuate and reinforce, and the difficulties regarding their scientific objectivation. Short of reinventing themselves, the humanities and social sciences must at least reconsider some of their modes of apprehending these problems in order to be better able to face the issues and challenges entailed.

To address these goals, this international conference, organised by the HSS of Health Research Platform under the impetus of the CNRS Institute for Humanities and Social Sciences and uniting various research institutions based mainly at Campus Condorcet, will in its first session present the research sponsored by this platform regarding the question of the involvement of citizens and public groups in research and healthcare. Subsequently, the conference will focus on health issues related to the environment and the workplace. It is intended as a space for discussion and dialogue, with presentations and sessions conceived for the collective exploration of a series of questions and the opening of new perspectives.

In this programme, the sessions in pink are held in French without translation, and the others are simultaneously translated into English.

Simultaneous interpretation will be provided for the whole afternoon session

2:00-4:30

EMERGING RESEARCH IN OCCUPATIONAL AND ENVIRONMENTAL HEALTH: THE CITIZEN SCIENCES THROUGH THE LENS OF THE SOCIAL SCIENCES, PRESENTATION OF THESE IN PROGRESS

HOST: VALENTIN THOMAS, European University Institute of Florence / Sciences Po Lyon, JUSTYNA MOIZARD-LANVIN, Université Paris-Cité

MODERATOR: MAËL GOUETRI, Université Paris-Cité

Envisioning Environmental Data Justice through Air Monitoring in the Eagle Ford Shale Play of Texas
LOURDES VERA, University at Buffalo (videoconference with simultaneous interpretation)

After the Lubrizol fire, participatory research challenging the governance of industrial risk
ESTELLE MESLIER-AURIAULT, Université de Caen Normandie

Public mobilisation and data policies: the case of air quality
JUSTYNA MOIZARD-LANVIN, Université Paris-Cité

Popular Epidemiology and Occupational Medicine: Ardystil Case As an Example of Intoxication in Work Environments
SOFIYA KAMALOVA, Universidad Alicante

4:30

BREAK

5:00-6:00

KEYNOTE: METHODS AND RESOURCES FOR DEVELOPING TRANSDISCIPLINARY ENVIRONMENTAL HEALTH RESEARCH TEAMS

PHIL BROWN, Northeastern University (videoconference)

7:00

COCKTAIL BUFFET

OCTOBER 25, 2022

In French without translation

9:30-10:30 am

KEYNOTE: THE PROLIFERATION OF ALERTS UNDER THE EYE OF PRAGMATIC SOCIOLOGY. REEXAMINING A SOCIO-I.T. OBSERVATORY FOR ENVIRONMENTAL AND HEALTH CONTROVERSIES

FRANCIS CHATEAURAYNAUD, EHESS
10:30  
**BREAK**

11:00-1:00 pm  
**ROUNDTABLE: ACTORS AND APPROACHES IN THE REGULATION OF ENVIRONMENTAL HEALTH RISKS**

**MODERATOR:** Soraya Boudia, Université Paris-Cité

The role of ANSES evaluations in the regulation of occupational health  
HENRI BASTOS, ANSES

The invisibilisation of occupational health problems  
VÉRONIQUE DAUBAS-LETOURNEUX, EHESP

Toxicity evaluations in the organisation of knowledge for health and environmental decision-making  
DAVID DEMORTAIN, Inrae

Monitoring and actions to promote healthful environments  
SEBASTIEN DENYS, Santé Publique France

A thorn in the foot? The social sciences in environmental health evaluations  
JEAN-NOËL JOUZEL, CNRS

How do socio-economic analyses contribute to health evaluations?  
LAURA MAXIM, CNRS

1:00-2:30  
**LUNCH**

Simultaneous interpretation will be provided for the whole afternoon session

2:30-3:30  
**KEYNOTE: PUBLIC ENGAGED RESEARCH ACROSS SCALE: FROM SOUTHERN CALIFORNIA TO TEXAS, TAIWAN AND VIETNAM**

KIM FORTUN, University of California Irvine (with simultaneous interpretation)

3:30  
**BREAK**

4:00-6:00  
**ROUNDTABLE: MOBILISATIONS IN OCCUPATIONAL AND ENVIRONMENTAL HEALTH: ISSUES AND TENSIONS**

**MODERATOR:** Emilie Counil, Ined

The media handling of environmental issues  
MARTIN BOUDOT, investigative journalist and documentary filmmaker

Chlordecone pollution in the Antilles  
JOSIANE JOS-PELAGE, AMSES-Medical Association for the Protection of Health and the Environment (videoconference)

Mobilisations in response to Lubrizol Fire  
SIMON DE CARVALHO, Association des sinistrés de Lubrizol (association for victims of the Lubrizol factory fire)

Environmental and occupational frontiers in mobilisations  
ANNIE THÉBAUD-MONY, Association Henri Pézerat
OCTOBER 26, 2022

Simultaneous interpretation will be provided for the whole morning session

9:30-10:30 am

KEYNOTE: FROM OBSERVER-RESEARCHER TO PARTICIPATORY ACTION-ORIENTED RESEARCH TEAM: MAKING CIVIC ENVIRONMENTAL HEALTH SCIENCE IN FRENCH AND US CONTEXTS

BARBARA ALLEN, Virginia Tech (with simultaneous interpretation)

10:30 BREAK

11:00-1:00 pm

ROUNDTABLE: EXPERIENCES IN RESEARCHING AND EXPOSING OCCUPATIONAL AND ENVIRONMENTAL HEALTH PROBLEMS

MODERATOR: Emmanuel Henry, CNRS

Occupational cancers as environmental health watchdogs: contributions and limits of the GISCOPs
SYLVAIN BERTSCHY, CNRS, MORITZ HUNSMANN CNRS, ZOË ROLLIN, Université Paris-Cité

Initiating interdisciplinary and participatory research in polluted areas. The case of south Lyon
GWENOLA LE NAOUR, Science Po Lyon, VALENTIN THOMAS, European University Institute of Florence / Sciences Po Lyon

Fos EPSEAL: public engagement and interdisciplinarity (social sciences and epidemiology) to build knowledge in environmental health in light of local contexts
JOHANNA LEES, LaSSA/CNE, MAXIME JEANJEAN, Institut éco-citoyen

The global silicosis epidemic: understanding and transforming the Andalusian ecosystem (1990-2022)
CATHERINE CAVALIN, CNRS

1:00-2:30 LUNCH

In French without translation

2:30-4:30

ROUNDTABLE: THE FUTURE FOR RESEARCH IN THE HUMANITIES AND SOCIAL SCIENCES ON ISSUES IN OCCUPATIONAL AND ENVIRONMENTAL HEALTH

MODERATOR: Marie Gaille, CNRS

NICOLAS DUVOUX, Université Paris 8 / CNLE (National Council against Poverty and Social Exclusion)
BRICE LAURENT, ANSES/Mines Paris
VALÉRIE LEMARCHANDEL, FRM (Medical Research Foundation)
SYLVIE OLLITRAULT, EHESP/CNRS
ANNE RASMUSSEN, EHESS

4:30 CONCLUSIONS AND PERSPECTIVES
Launched in fall 2020 for a period of 24 months, with funding from the French Ministry of Higher Education and Research, the Plateforme SHS Santé (Humanities and Social Sciences of Health research platform) seeks to develop, for the purpose of research in the humanities and social sciences across all of their component disciplines, a collaborative action in health research.

The CNRS Institute for Humanities and Social Sciences wanted to collaborate on the development of this platform with the Ined, the EPHE, the EHESS and Université Sorbonne Paris Nord. All are member institutions of Campus Condorcet, one of whose scientific missions is “Public Health, World Health”. Other institutions outside the Campus, such as the EHESP and the Cnam, are also associated with the platform.

This collaborative research project focuses in particular on three themes:

► The involvement of patients and the public in the organisation of services, the formulation of public policies and research.
► The effects of structural evolutions, especially environmental, climatic and demographic, on human health and lifestyles.
► The challenges of implementing public health policies at the regional level, in particular as concerns health inequalities of all kinds.

Although the project revolves around the humanities and social sciences as they relate to health, it is also motivated by the intention to develop their interfaces with other disciplines, especially the environmental sciences, the biomedical field, public health, and the engineering and information sciences.

Lastly, this platform seeks to develop mechanisms for the transfer of knowledge to civil society, relying on participatory research methods and in cooperation with local and national stakeholders, as well as to public decision-makers.

The platform is housed in the Campus Condorcet.
