

General information

Offer title : Knowledge of Contemporary China (M/F) (H/F)

Acronyme : CHINE

Reference : CPJ-2024-047

Supporting establishment : National Center for Scientific Research

President and CEO : Antoine PETIT

Site concerned : EHESS, Lyon Saint-Etienne, Sorbonne Paris Cité

Academic region : Paris, Lyon

Envisaged partner institution : EHESS - ENS Lyon - INALCO

Establishment code :

- UMR5062
- UMR8043
- UMR8173

Date of publication : 14 February 2024

Type of Contract : Tenure Track Position

Contract Period : between 3 and 6 years depending on the research project and the profile of the scientist

Proportion of work : Full time

Remuneration : Annual salary from 54 600 Euros to 57 800 Euros depending on professional experience.

Scientific theme : Human and social sciences - Law, economics, management

Section(s) CN :

33 - Modern and contemporary worlds

36 - Sociology and legal sciences

37 - Economics and management

38 - Anthropology and comparative study of contemporary societies

39 - Spaces, territories and societies

40 - Politics, power, organisation

Profile Required

Holders of a doctorate or a PhD or equivalent degree or applicants who have gained scientific qualifications or carried out scientific work deemed to be of an equivalent level. There is no restriction on the age or nationality of applicants. All CNRS positions are accessible to people with disabilities, with special arrangements for tests made necessary by the nature of the disability

Institution Strategy

The centrality of China in the contemporary world is becoming increasingly apparent, whether on a French or European scale. The profile of the proposed CPJ corresponds to the need to strengthen the/our understanding of contemporary China, its internal dynamics and the issues related to its place in the world. This Chair is consistent with CNRS SHS ' methodological priority dedicated to areal studies.

Host Lab Strategy

The research developed in the potential host laboratories focuses on the Chinese space. The latter gather several disciplinary fields and competences: anthropology, law, economics, contemporary history, sociology, political science, territorial science. They are co-supervised with institutions with which CNRS Humanities and social sciences wishes to develop or already has privileged relations in this field of research.

International Strategy

The Chairholder will be expected to implement actions and partnerships in the thematic field, and in particular to commit to submitting a project in response to European calls for proposals (ERC, Horizon Europe Consortium, etc.) during his or her contract.

National Directory of Research Structures (RNSR) of the host laboratory

200612822R - UMR8173 - CCJ Chine, Corée, Japon

199511753B - UMR5062 - IAO Institut d'Asie Orientale

201922952V - UMR8043 - IFRAE Institut Français de Recherche sur l'Asie de l'Est

Summary of the scientific project

Understanding contemporary China and its place on the international stage can only be achieved through an intimate knowledge of its internal dynamics and the role it plays on the world stage. Expected research may focus on Chinese society, which is currently undergoing radical changes, leading us to examine social mobilities, social recompositions and new stratifications. These elements transform the structure of families, social groups, territories and natural environments, as well as cultural and religious practices. Research may also address the various aspects of China's economic and financial power, both internally and in its interactions with international partners. It may also focus on the political dimensions of the Chinese state: institutional, reformative or legal, without forgetting the geopolitical question.

Summary of the teaching project

Teaching will be discussed in relation to the site where the recipient will be assigned. He/she will be involved at each site in existing courses.

Financial Environment

- Total (included package ANR) : 200 k€
- Total financement : k€

Scientific dissemination

The dissemination of the results will be done through world-class scientific productions: publications, patents, software... In addition, the results will be communicated to various targets such as scientific communities, media, decision makers, general public, schools, etc., with an adapted calendar. Specific tools may be developed such as websites, newsletters, meetings, international symposia, summer schools and conferences.

Open Science

The CNRS is developing a strong policy in favor of open science. Open science consists of making research results "as accessible as possible and closed as necessary". As such, the CNRS aims to make 100% of the texts of publications resulting from the work of its laboratories accessible, in particular through deposit in HAL. The data produced must also be made available and reusable, except for specific restrictions. In addition, the guiding principles of individual evaluation have been revised in accordance with the DORA declaration, to be more qualitative and to take into account all facets of the researcher's profession.

Science and society

The relationship between science and society is now recognized as a full dimension of scientific activity. The project will develop this dimension in synergy with all the partners. The resulting research work will contribute to informing public decision-making. Participatory science initiatives may be initiated with actors from the project's socio-economic and cultural eco-system.

Indicators

The activity will be evaluated in particular on the basis of scientific production (publications, software, patents, etc.), on institutional and private partnerships formalized by contracts, on international presence, on the promotion of work to multidisciplinary scientific communities, on innovation and its transfer to society and on scientific dissemination to non-specialist audiences.

Methods of organization of the interviews

Only the candidates selected on file by the selection committee will be invited to the auditions.
